---

## Convert Spool Files to Common PC Formats

Save spool file contents to any PC file easily. Supports conversion of downloaded spool files to txt, prn, pdf, rtf, html, tif as well as various Spreadsheet formats when used with Ez-Pickin's.

Also comes with additional functionality to for:

- PDF functionality: bookmarks, overlay, compression, encryption, font and page layout control
- RTF functionality: bookmarks, overlay, font and page layout control
- HTML functionality: bookmarks, overlay, font
- "Profiles" to save settings for pdf/rtf/html

---

## Flexible Distribution and Storage

- Email and archive spool files anywhere on your network directly from Spool-Explorer.
- Zip downloaded spool files into new zip files or append to existing zip files. Encrypt zip files
- Submit to Nexus WOW
- Deliver reports to web pages as HTML.
- Combine and extract report data into new documents using 'print areas'

---

## Access Multiple iSeries

- Access any number of attached iSeries - AS/400(s)
- Easily switch between attached iSeries - AS/400s
- Uses a super-fast TCP/IP connection to quickly download and distribute spool files
- View list of Output queues available on the attached iSeries
- Unlimited number of local or remote PC users

---

## User Friendly Interface

- Tabbed User Interface to allow easy switching between multiple open spool files.
- Select columns to display for spool file lists
- Group spool file list into folders
- List and subset by user, queue, form type, user data, filename, jobname
- Jobname supports generic selections
- User configurable tool bar, including 4 custom buttons that you can configure for your own use
- Select multiple spool files from the list to perform the selected operation on
- Context sensitive help
- Support for multiple language downloads using selectable translation tables
- Create 'quick rules' for catapult processing

## Download Spool File Contents in Three Formats

- Print format: Embedded blank lines allow you to see the report contents exactly as they appear when printed
- Data format: Compressed format excludes blank lines for even faster distribution.
- Rich format: Print format + the ability to add rich format tags to the report for extended functionality such as Bar Coding

---

## Integration with Nexus WOW

Submit your documents to the Nexus WOW (Web Object Warehousing) portal in Nexus. It is a secured iSeries-centric store for documents of all types, including iSeries spool files and documents uploaded to the store by authorized users from their own PC and network drives. File types include PDF, Images / Graphics, Word, Excel, PowerPoint and more. It provides extremely secure access to documents over the intranet or internet.

---

## Ez-Pickin's Integration for Spreadsheet Support

Seamless interface to EZ-Pickin's - while viewing a report, click once and EZ-Pickin's is launched with that report. Run EZPickin's report models for work flow automation.

- Customize views
- Update spreadsheets
- Create tables, charts and much more
- Export your spool files to Excel, Lotus 123, dBase, Paradox, XML Spreadsheet, MS Access database, Delimited Text, Fixed Length Text and HTML formats.

---

## User Security

- Set up security functions to constrain all or some of your users. Limit lists and list types, limit ability to hold, release, delete spool files. Define initial spool file list. Limit queues that are visible
- Support for OS/400 Password Level 2
- All passwords are Blowfish encrypted before transmission
