

# go IDEA™

## From intervention to reimbursement and everything in between

Go Solutions offers a customizable Special Education software solution that caters to your school districts needs. The core module, GoIDEA (formerly known as OASYS WAVES), is designed specifically for web-based Special Education IEPs. It increases staff productivity by automating the IEP process with time-saving tools and techniques, working seamlessly with your Student Information System to make sure that your documents are created with accurate and current information.

Tapping into data can help your district make a more informed decision. Check out some of our stats below!

Number of IEPs created within GoIDEA

Number of individuals using our GoIDEA IEP software solution platform

Number of active Special Education Students currently within GoIDEA
